Microsoft & C/D/H would like to invite you to an exclusive event.

**What gets in the way of your productivity?**

- Unable to meet the mobility needs of your end users?

- Challenged by budget and resource constraints?

- Unable to cost effectively provide highly available and resilient services your organization expects?

- Struggling to share information, communicate and collaborate with others internally or externally?

- Missing accessible information to make faster, smarter business decisions?

- Concerned about security of your information?

We are excited to invite you to our Cloud Solutions Series!

Come learn ways to Modernize your Data Center with Office 365, Azure & Power BI with the flexibility to move to the cloud at your own pace. C/D/H will be presenting an interactive session hosted at the Microsoft MTC.

This session will help you better understand:

- The business case for Office 365, whether you have an existing Enterprise Agreement or buy from Select Plus

- The flexibility provided by O365 for you to start a move to the cloud as you are comfortable, and continue migration at your own pace.

- The consistent end-user experience maintained by Office 365 that alleviates training concerns

- Unique Office 365 benefits such as Office for iPad, 1TB of storage per user with offline sync, etc.

- New onboarding and migration benefits introduced this year for customers with a minimum of 150 users

- Ways to utilize Microsoft's cloud platform to cut costs of expensive hardware

- Ways to find, connect to, explore and compile data easily from various sources

Government customers are considering cloud-based services for reasons such as:

- Increasing business agility

- Having the latest technology

- Verified Security

- Supporting mobile workers

- Lowering maintenance and ownership costs

At Microsoft, we take cloud-based productivity solutions just as seriously. Office 365 for Government is designed to meet the most rigorous requirements for security, privacy, reliability, and manageability. Hosted in Microsoft's secure, $9 billion network of state-of-the-art data centers, it brings together our most trusted productivity solutions—Microsoft Exchange Online, Microsoft SharePoint Online, and Microsoft Lync Online—with Microsoft Office across platforms and devices.
